ENGINEERING / PRODUCT / APPLIED AI

Danny Kuvonchbek

Full-Stack Developer · DevOps Engineer
AI Engineer · Agentic AI Developer

Building scalable web platforms and practical AI solutions.

Wonju, South Korea | +82 10-6761-9777 | sobirovich9702@gmail.com

hadijam.com | **maen.site** | **Visa: D-10**

Full-stack developer working across React and Next.js interfaces, NestJS and FastAPI services, and deployment workflows. Applies Cursor and Codex to practical implementation and refactoring.

01 EXPERIENCE / 4 YEARS 9 MONTHS

2024.09 - 2026.08

NOVASTACK TECHNOLOGIES

Full-Stack Developer

Built Next.js, NestJS and FastAPI platforms with REST and GraphQL services. Developed reusable React components and applied Redis caching.
Used Cursor and Codex for implementation and refactoring; supported Docker, Terraform and CI/CD workflows.

2021.01 - 2022.09

LUMEN SOFTWARE LAB

Backend Developer

Collaborated on REST API integration and data exchange between frontend applications and backend services.

2019.10 - 2020.09

NESTTECH DIGITAL

Frontend Developer

Developed responsive React applications, reusable UI components and API integrations with Redux or Context API.

02 SELECTED WORK

HaDiJaM

Marketplace, private chat, seller onboarding and GraphQL APIs. / hadijam.com
